Profile

I am an IT student passionate about software development and DevOps. I focus on building backend and web applications using technologies such as Go and Java, while also developing my understanding of networking.

I enjoy working on APIs, scalable systems, and solving real-world problems through code. I am continuously learning and improving my technical and problem-solving skills to grow as a software engineer.

Experience

2025 - Present
Self Learning

Junior Web & Backend Developer

Built personal projects using HTML, CSS, JavaScript, and Go. Practiced API development, Git version control, and responsive UI design. Continuously improving problem-solving and software development skills through hands-on practice.

2025 - Present
Projects

Personal Projects Developer

Developed small applications and practice projects including web pages, backend APIs, and UI components. Focused on building real-world coding experience and improving code structure and logic.

Professional Skills

Java

Go (Golang)

Backend Development

MySQL / PostgreSQL

RESTful APIs
